Block 2 Rivervale Link #13-04 (Singapore 545040) | Availability: May 2026 – December 2026

EDUCATION

Singapore Management University

Aug 2023 – May 2027

Bachelor of Information Systems, Major in Business Analytics and 2nd major in Artificial Intelligence

- **Relevant Experiences:** SMU Lit Hackathon, Ellipsis #Code Hackathon
- **Activities:** SMU Basketball Events Director, Data Science & Analytics Society Events Director, SMU Youth Mentors

PROJECTS

Project Smart Meter London

Aug 2025 – Dec 2025

- Developed a End to End Data Pipeline using Amazon services like s3,Emr and quicksight.
- Integrated and developed CI/CD into data pipeline to ensure better integration of data and optimisation
- Cleaned,processed and transformed large amounts of data using python spark

Project Brawlstars

Aug 2025 – Dec 2025

- Extracted and cleaned various formats and types of data from youtube and reddit regarding brawl stars info
- Developed and implemented different machine learning models for each format of data
- Conducted Fusion of models into a multimodal model that has capabilities in detecting emotions from data of various formats

EXPERIENCE

Data Engineer, SATS

Dec 2025 – May 2025

- Assisted in designing, developing, and maintaining ETL pipelines
- Supported data integration from various sources into cloud-based data platforms.
- Worked with SQL and Python to clean, transform, and analyse data.
- Participated in data platform and data management framework design and implementation
- Collaborated with cross-functional teams to understand data requirements and deliver solutions
- Utilised Azure tools and services to deploy and monitor data workflows
- Implemented data management, processing, and analytics tools on Databricks
- Documented processes and contributed to knowledge-sharing within the team.

Fullstack/Data Engineer, LedgerNow

May 2025 – Aug 2025

- Developed Rest API Service using Java Spring and Maven
- Delivered Automated Web Scraping solutions to obtain e-commerce product listings using Java
- Created Data pipelines and ETL jobs using amazon S3, glue and spark
- Cleaned and processed data using python and created visualizations using tableau
- Derived strategies for company's ecommerce business using processed data
- Researched and developed impactful tech solutions for Islamic finance practices
- Implemented OCR workflows using Gemini with customized prompts to extract and validate data from uploaded documents.

Teaching Assistant, IS112 Data Management

Jan 2025 – Apr 2025

- Assisted the course instructor in developing teaching materials and delivering content on data management principles, while supporting students in mastering tools like SQL. Provided one-on-one guidance addressing queries, and clarifying concepts.

ADDITIONAL

SMU Data Science & Analytics Events Director

Jan 2025 –May 2026

Events Director

- Organized and facilitated data analytics workshops and events for SMU data science students, delivering hands-on training in Python, machine learning, and statistical analysis techniques

TECHINICAL PROFICIENCIES

Programming Language and Tools

- SQL, Python, Java, JavaScript, CSS, HTML, PHP, Vue.js, Java,
- NumPy, Pandas, Docker, Matplotlib, Git,Firebase, Microsoft Azure & Excel, Springboot, aws S3, aws glue, spark, hadoop

Relevant Coursework

- **Analytics foundation** (Learned Statistical modelling and algorithms, Linear regression, Classification,k-means)
- **Machine Learning and Applications** (Learned and applied relevant machine learning principles and languages)
